The Enviro Wood Stoves

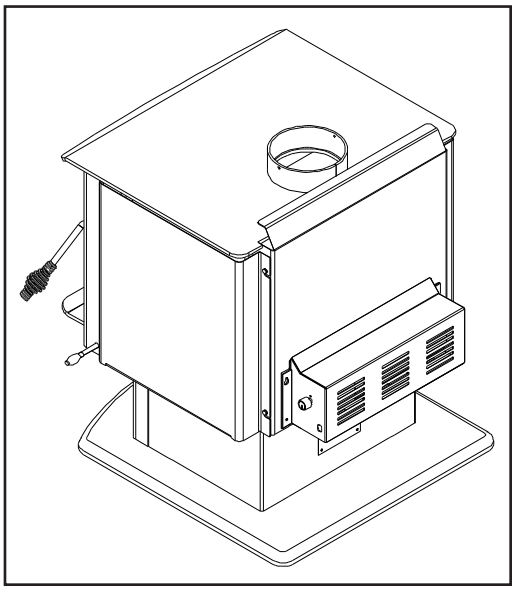
Optional Fan Kit

EFW-261

This appliance when installed, must be electrically connected and grounded in accordance with local codes or in the absence of local codes, with the current CSA C22.1 CANADIAN ELECTRICAL CODE. Part 1, SAFETY STANDARDS FOR ELECTRICAL INSTALLATIONS, or THE NATIONAL ELECTRICAL CODE ANSI / NFPA 70 in the USA.

CAUTION

Label all wires prior to disconnection when servicing controls. Wiring errors can cause improper and dangerous operation. Verify proper operation after servicing.



1. Remove the fan assembly from the box and inspect for any damage to the assembly. If damage is noticed call your dealer, distributor or courier company and have components replaced.
2. Remove the knock out at the bottom of the back panel of the appliance by using a flat head screwdriver as a lever, hook the tip of the screwdriver under the panel beside the tabs and push the panel out.
3. Install two screws into the top two holes. Place the blower assembly over these two screws.
4. Ensure the temperature sensor will touch the unit when mounted. If it does not touch, adjust the sensor so it does. Tighten the two top screws and install the two bottom screws and tighten.
5. Plug the fan assembly in and check for proper operation.

DO NOT cut or remove the grounding prong from the plug. **DO NOT** route the power cord beneath the heater.

WARNING: This appliance is equipped with a three-prong (grounding) plug for your protection against shock hazard and should be plugged into a properly grounded three-prong receptacle.

This is a basic wiring diagram for the option fan installation. Models 1200, 1700, and 2100; freestanding units only.

1. Plug the fan assembly into a three prong (grounded) receptacle.
2. Turn the fan controller to the desired setting.
3. Once the unit has reached operating temperature, the fan temperature sensor will turn the fan on automatically.
4. When the unit cools down the fan temperature sensor will shut the fan off automatically.
